<b>Product dimensions (D x W x H), inches</b>	18.5 x 14.56 x 14.17
<b>Shipping weight, pounds</b>	27.5

\*May vary due to variations in paper

This creasing and perforating machine is designed for the final processing of graphic materials up to 12.6" x 17.7" in paper size. Simple hand operated machine with a working width of 12.6" allows a crease and/or perf to be made with the same quality as the electric GoCrease™ 4000/SEMI. Eccentric wheel of operating mechanism demands only minimum effort to process the paper, even for heavy stocks or laminated documents. Skew paper can also be creased/perforated due to thumb wheel angle adjustment of side guide. The GoCrease 3000 has an exchangeable creasing and perforating knife, as well as 3 different creasing channel widths.

## Features

### SIDE ADJUSTMENT

Side adjustment wheels for quick exchange of paper position.

### SIDE GUIDE

Side guide with skew adjustment for ease of use.

### ERGONOMIC BAR

Ergonomic bar for easy creasing with minimum use of force.
