

TCC2700 Laminator

The Tahsin TCC2700 is a fast, easy to use and economical roll laminator. This 27" roll laminator is ideal for all educational institutions, businesses, and offices that need a reliable, medium to heavy-duty laminator for a variety of lamination applications.

It features spring-loaded adjustable pressure on laminating and pull rollers. The adjustable tension on both upper and lower supply rolls assures controlled, smooth even lamination without wrinkle or curl. This variable speed laminating machine will accept 1.5 mil to 10 mil laminating film. Heated rollers made of top-grade silicon rubber help to ensure bubble and scratch-free lamination.

FEATURES:

- Variable speed
- Spring loaded adjustable pressure on laminating rollers
- Adjustable tension on both upper & lower supply rolls to assure controlled, smooth even lamination
- Heavy-duty chain & sprocket drive
- Accepts 1.5 mil to 10 mil
- Adjustable feed guide
- Manual with threading diagram
- Easy accommodation for 1,000 feet of 1.5 mil (.0015) laminating film on 1" core
- Laminating rollers made of top-grade silicon rubber
- Heated rollers
- Laminates materials up to 1/16" thick
- UL approved

SPECIFICATIONS:

- | | | | |
|-------------------------|-----------------------|--|----------|
| - Machine Dimension | 30.5" x 17.7" x 14.2" | - Power Consumption | 1,600 W |
| - Machine Weight | 88.2 lbs | - Tension Control Function | Yes |
| - Motor | DC 24V | - Roller Separation Function | Yes |
| - Power Supply | USA 110V - 120V/60HTZ | - Roller Material | Silicon |
| - Max. Lamination Width | 27" | - Number of Rollers | 4 |
